APEX

reworked

AT A GLANCE

Almost exactly one year since its initial launch, the Apex Bench Desking range has been refined and improved for ultimate customer usability and efficiency.

Four desktop options

The updated Apex bench desks now offer four distinct top configurations to better suit different workspace needs and aesthetics.

Cutback /C

- 25mm removed from rear edge
- Tops can move 9mm front-to-back in beam slots
- Recommended for full-width screens

Porthole /P

- Full depth rectangular top with two cable access ports
- Recommended for full-width screens

Scalloped /S

- Shaped cutout along the rear edge
- Deeper in the centre and tapering to closed ends
- Recommended for inset screens

Full Top /F

- Full-sized rectangular top designed for meeting and boardroom configurations
- Available in depths of 1000-1600mm

Simplified assembly

Apex cable trays now have a **tool-less hook-on bracket system**. The tray hooks onto brackets and can be easily removed and refitted without the use of tools, particularly handy when installing monitor arms or accessing cables.

And of course, Apex still features our innovative **One Bolt System™** - using just one type of standard bolt across all components to make installation quick and hassle-free.

By simplifying assembly and reducing friction at every stage, our aim is to set a benchmark for functional, future ready furniture solutions.

Standardised sizing

The Apex A-Frame Bench is now available in depths of 600, 700 and 800mm, in line with the other leg frame options.

Boardroom tables

To make the ordering process more efficient, our Apex Boardroom tables can be built up using Starter and Add-On units.

This means cut-outs and inlays can be easily incorporated at the time of specification without extra lead time.

Leg styles

The leg frame on our Apex Boardroom tables and Apex Return bench desks are now customisable to match your bench leg frame: Goalpost, A-Frame, Loop-Leg or Loop-Leg Infill.

Alternatively, mix and match leg styles for a truly unique end result.

Personalised finish

With 16 MFC finishes and 12 steelwork options, the opportunities to customise with colour are endless. Our steelwork finishes are all at **no extra cost**.

APEX GOALPOST BENCH DESK WITH SCALLOPED TOP IN WHITE OAK AND DEEP TEAL
