5 star chrome on castors
Width: 675mm
Depth: 675mm
Height: 850mm
Seat Width: 460mm
Seat Depth: 430mm
Seat Height: 500mm

CHARLOTTE XS
High 4 leg tube painted
Width: 650mm
Depth: 600mm
Height: 1100mm
Seat Width: 460mm
Seat Depth: 430mm
Seat Height: 750mm

CHARLOTTE S
4 spoke polished aluminium swivel and tilt base
Width: 735mm
Depth: 720mm
Height: 875mm
Seat Width: 505mm
Seat Depth: 475mm
Seat Height: 390mm

CHARLOTTE S
4 leg natural painted beech (no swivel or tilt)
Width: 735mm
Depth: 720mm
Height: 875mm
Seat Width: 505mm
Seat Depth: 475mm
Seat Height: 400mm

CHARLOTTE L
4 spoke polished aluminium swivel and tilt base
Width: 810mm
Depth: 950mm
Height: 1070mm
Seat Width: 535mm
Seat Depth: 480mm
Seat Height: 470mm

CHARLOTTE L
4 leg natural painted beech (no swivel or tilt)
Width: 810mm
Depth: 950mm
Height: 1070mm

Band 1
Camira, Upland

Band 3
Camira, Blazer

Band 3
Camira, Main Line Flax

Band 3
Camira, Oceanic

Band 5
Camira, Yoredale

Please note: The fabric options shown above have been carefully selected based on their suitability and performance for this upholstered product, ensuring the best possible finish and manufacturing quality. Customers are welcome to specify an alternative fabric if preferred, however, as different fabrics can vary significantly in their stretch, thickness, composition and upholstery characteristics, Hawk cannot accept responsibility for the appearance, fit or overall finish of the completed product when a non-standard fabric is selected. POA

CONFORMITY

We endeavour to only source products from FSC® certified suppliers. FSC® certified timber products are available on request. (License Holder FSC®C199861).

QUALITY

This range has been designed and manufactured to our high standards of quality and is guaranteed for 5 years.

SUSTAINABILITY INFORMATION

POWERED BY SOLAR

Our factory roof is fitted with solar panels, supplying over 50% of our power needs. Given the energy-intensive nature of furniture manufacturing, these panels are crucial to Hawk's net zero carbon initiative. Since October 2022 our solar system has logged a reduction in CO2 of 285t, an equivalent of planting 158 trees and a saving of 114t of standard coal.

BIOMASS BURNER

In addition to sourcing sustainable and certified board, we take extra measures to reduce our carbon footprint. Waste board is utilised to power our cutting-edge biomass burner, while larger off-cuts are repurposed for the core of our budget-friendly screens. This not only helps in offering competitively-priced desk screens but also contributes to warming our factory and powder-coating ovens, significantly cutting down on energy consumption.

SCOPE 1, 2 & 3 EMISSIONS

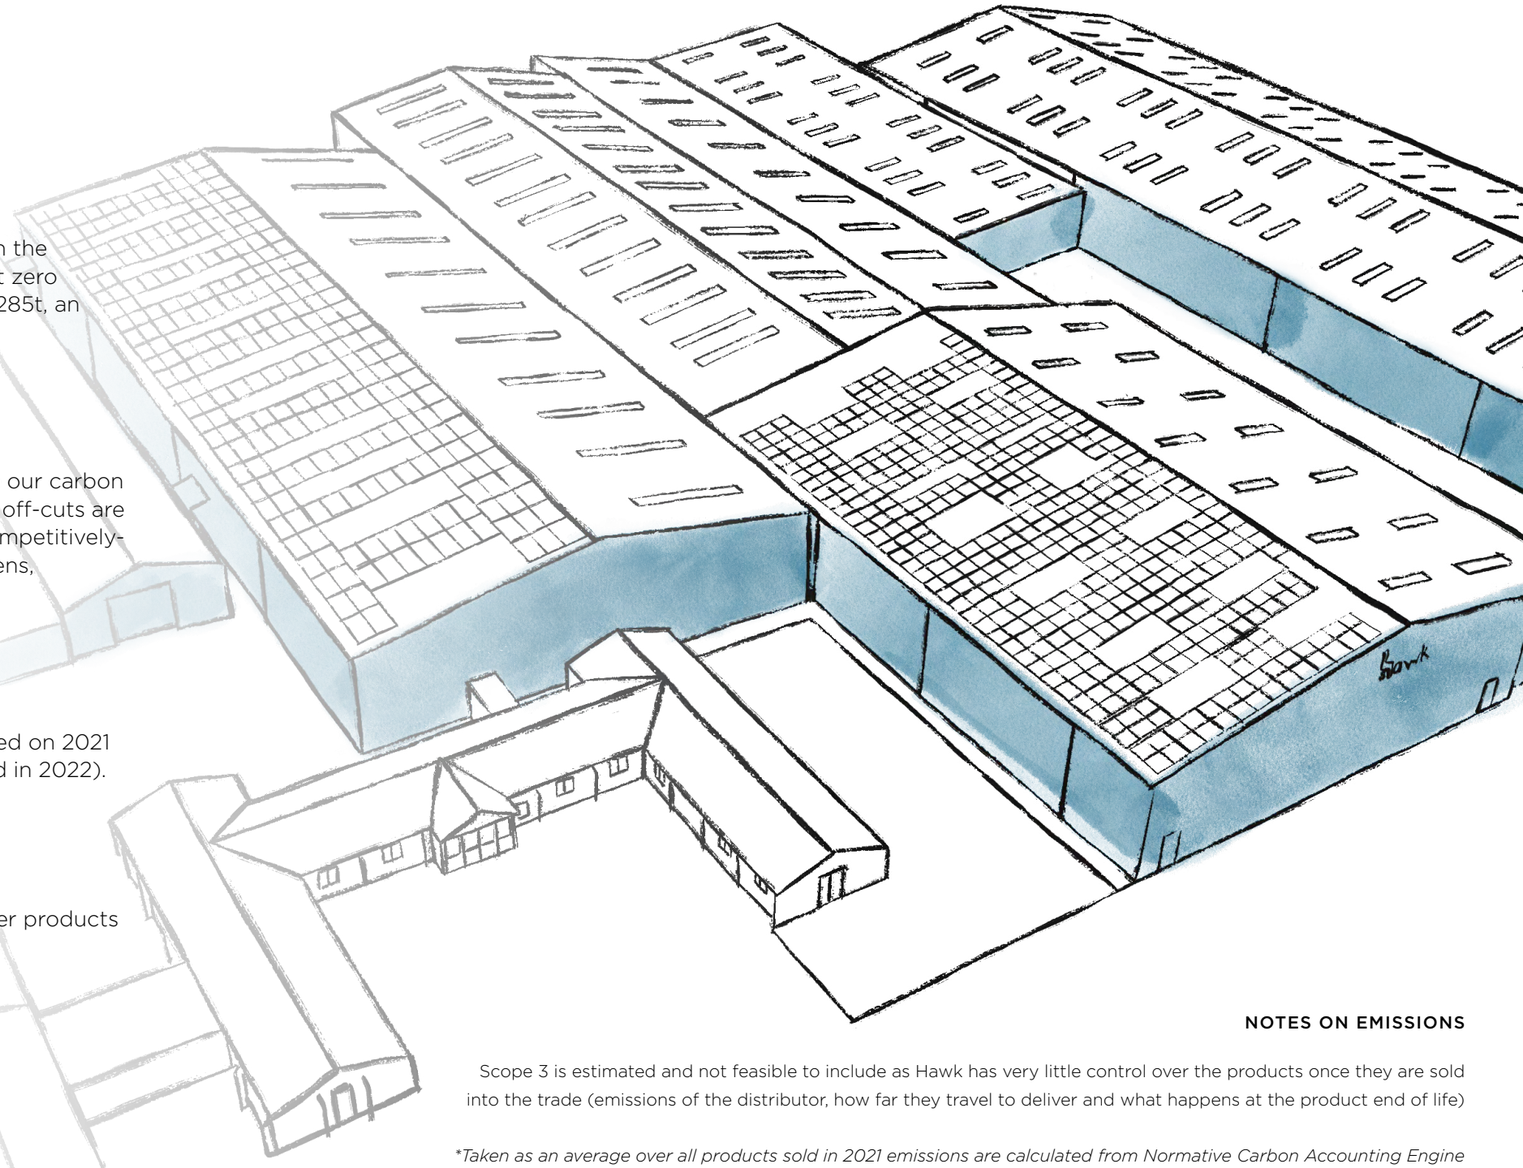

Scope 2 emissions of as little as 3.1kg per product manufactured*. Figures calculated based on 2021 usage and do not include reduction of energy that the solar panels provide (only installed in 2022).

RESPONSIBLE MANUFACTURING

We endeavour to only source products from FSC® certified suppliers. FSC® certified timber products are available on request. (License Holder FSC®C199861).

OUR FLEET

Our company owned vehicles are all hybrid or electric.

NOTES ON EMISSIONS

Scope 3 is estimated and not feasible to include as Hawk has very little control over the products once they are sold into the trade (emissions of the distributor, how far they travel to deliver and what happens at the product end of life)

**Taken as an average over all products sold in 2021 emissions are calculated from Normative Carbon Accounting Engine and include all available data. Where no such data exists, a calculated estimate has been substituted.*

MFC RECYCLABLE CONTENT

The bioeconomy, a prominent resource-saving approach, states: It is better to use raw materials that regrow within a time frame of a generation than raw materials that take millions of years to regenerate.

Melamine Faced Chipboard used in the manufacture of office furniture at Hawk has been sourced from FSC® & PEFC certified suppliers. An assurance that the product that you are buying is from a sustainably managed forest.

The MFC boards that we source are made from approximately **88%** wood and paper with the exception of White, which is virgin wood and offset with the planting of trees by the supplier.

STEEL RECYCLABLE CONTENT

The production of tube comes from purchases of raw material from steel mills, that employ two different production processes:

- BOF technology (steel from oxygen furnaces), with a scrap content of 15-25%
- EAF technology (stell from electric furnaces), with a scrap content of 80-90%

The type of supplied product shall be (unless different requirements are stated at the point of order) one of these two manufacturing processes, according to availability.

CLEANING & CARE INSTRUCTIONS

MFC is the most practical and low maintenance material for use in an office environment, offering the following benefits:

- Scratch resistant
- Resistant to household cleaning products and chemicals
- Resistant to cigarette burns
- Colour-fastness under artificial light
- Resistant to cracking
- Impact resistance
- Abrasian resistant
- Ease of maintenance
- Hygenic surface

LIGHT SOILING

Clean with a paper towel, a soft clean cloth (dry/damp) or a sponge.
If using a damp cloth, dry the surface with an absorbent paper towel or microfibre cloth.

NORMAL SOILING / EXTENDED CONTACT

Clean with a paper towel, a soft clean cloth (dry/damp) or a sponge. If using a damp cloth, dry the surface with an absorbent paper towel or microfibre cloth. Clean with warm water, a clean rag or microfibre cloth, a soft sponge or soft brush. Use normal domestic cleaners or soaps that have no abrasive ingredients. Then wipe with fresh water, removing all traces of the cleaning agent, to prevent streaks forming. Dry the surface with a clean, absorbent cloth or paper towels.

The following cleaning agents should not be used under any circumstances:

- Scouring and abrasive agents (abrasive powders, scouring pads, steel wool)
- Polish, washing powder, furniture cleaner, bleach
- Detergents with strong acids and acidic salts
- Steam cleaning equipment

METALWORK

Metalwork is polyester-resin powder-coated and resistant to minor scratching, chipping, abrasions, cracking and daily wear and tear and therefore only requires regular dusting and occasionally washing down with luke-warm soapy water if required. No strong detergents are required.
