# HEARTH

PODS & BOOTHES

## HEARTH MEETING BOOTHS

Office pods are a highly practical fix, giving employees private, acoustically controlled spaces to focus, meet, or recharge - without costly construction.

Hearth meeting pods deliver a truly agile, future-ready solution.

Engineered for quick and straightforward assembly, the Hearth collection can be easily moved and reconfigured as your workspace layout evolves.

## HEARTH MEETING PODS

### OVERVIEW

A selection of open front, two, four or six person capacity booths  
seating 28-30mm thick fabric screen  
Shared desktop included

Each panel supplied with 2 x height adjustable feet to allow for uneven floors

Customisable fabrics, POA for higher fabric bands

Tested to FIRA BSEN 1023 - Parts 1, 2 & 3

6 - 8 weeks lead time

### SHAPES & STYLES

Hearth02

Hearth04

Hearth06

### QUALITY

This range has been designed and manufactured to our high standards of quality and is guaranteed for 5 years.

### CONFORMITY

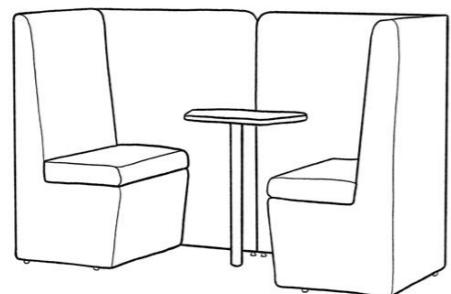

We endeavour to only source products from FSC® certified suppliers. FSC® certified timber products are available on request. (License Holder FSC®C199861).

The mark of  
responsible forestry  
FSC® C199861

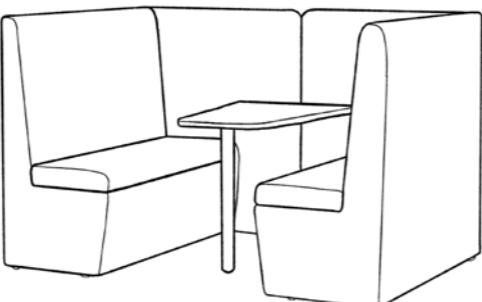

## HEARTH02

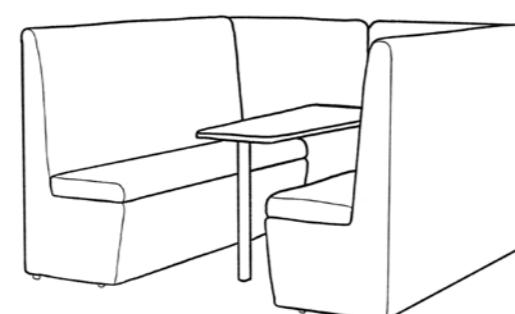

**Width:** 2000mm  
**Depth:** 800mm  
**Height:** 1250mm

## HEARTH04

**Width:** 2000mm  
**Depth:** 1400mm  
**Height:** 1250mm

## HEARTH06

**Width:** 2000mm  
**Depth:** 2000mm  
**Height:** 1250mm

## SUSTAINABILITY

On average each screen is manufactured from materials with 91% recyclable content and 28% recycled content.

## MATERIALS

Internal panel construction is from 2 x 12mm medium density fibreboard (MDF), which are adhered together with 21mm brads with 70mm radius top and bottom corners on rear panels and 250mm radius top and bottom front corners on return panels.

Seat constructed from various timbers, foam and strapping (50mm 60% and 5% stretch webbing) all of which is mechanically fixed and adhered together (using water based adhesive)

Seat construction includes 6mm general foam and 40 and 70mm seating foam.

Seat construction includes 2.5, 9 and 18mm medium density fibreboard (MDF).

Seat construction includes 44mm square planed square edge (PSE) 5th grade European Redwood (pine).

Seat base is covered in 1mm thick black cotton lining cloth.

Seat is upholstered (with multiple double top stitches) in 1mm thick Camira fabric.

## PERSONALISATION

Available in fabric price bands 1-3, Hearth booths can be fully customised to complement any workspace or reflect your brand's colour palette.

Across all configurations, the shared desktop can be specified in any of our 16 MFC finish options at no additional cost, allowing for complete design flexibility.

## SUSTAINABILITY INFORMATION

### POWERED BY SOLAR

Our factory roof is fitted with solar panels, supplying over 50% of our power needs. Given the energy-intensive nature of furniture manufacturing, these panels are crucial to Hawk's net zero carbon initiative. Since October 2022 our solar system has logged a reduction in CO2 of 285t, an equivalent of planting 158 trees and a saving of 114t of standard coal.

### BIO MASS BURNER

In addition to sourcing sustainable and certified board, we take extra measures to reduce our carbon footprint. Waste board is utilised to power our cutting-edge biomass burner, while larger off-cuts are repurposed for the core of our budget-friendly screens. This not only helps in offering competitively-priced desk screens but also contributes to warming our factory and powder-coating ovens, significantly cutting down on energy consumption.

### SCOPE 1, 2 & 3 EMISSIONS

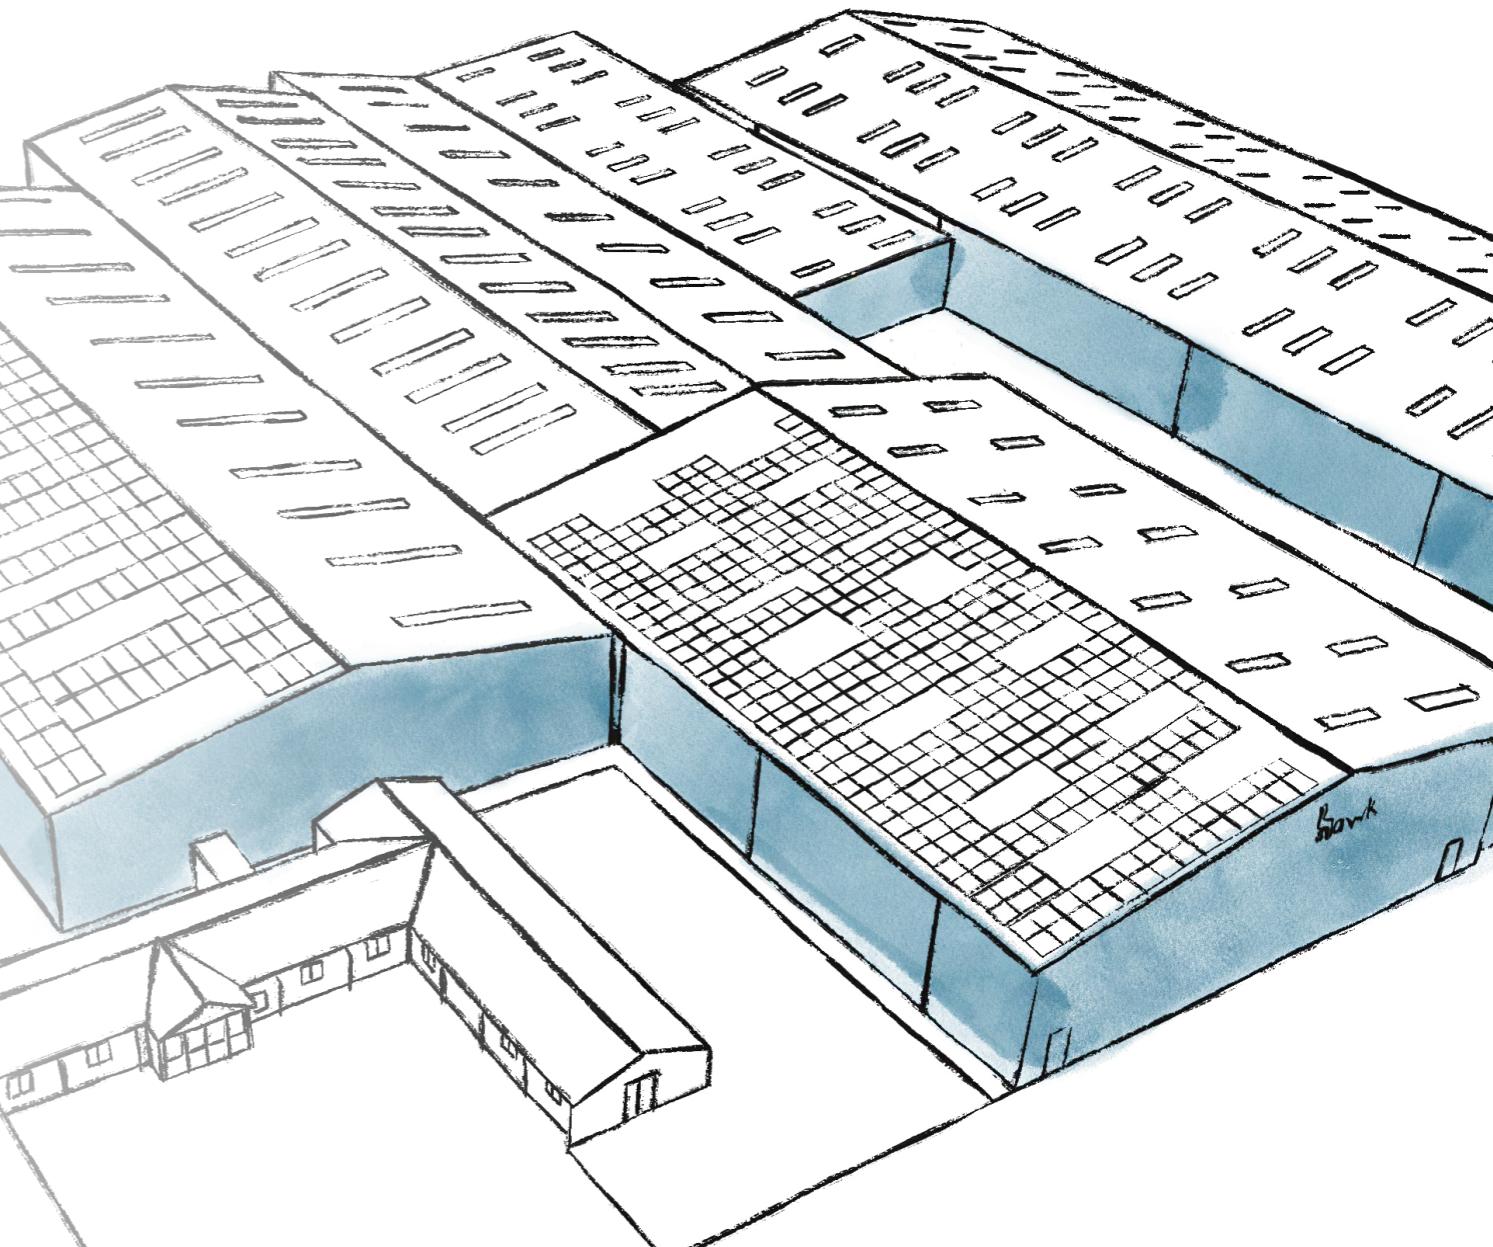

Scope 2 emissions of as little as 3.1kg per product manufactured\*. Figures calculated based on 2021 usage and do not include reduction of energy that the solar panels provide (only installed in 2022).

### RESPONSIBLE MANUFACTURING

We endeavour to only source products from FSC® certified suppliers. FSC® certified timber products are available on request. (License Holder FSC®C199861).

### OUR FLEET

Our company owned vehicles are all hybrid or electric.

### NOTES ON EMISSIONS

Scope 3 is estimated and not feasible to include as Hawk has very little control over the products once they are sold into the trade (emissions of the distributor, how far they travel to deliver and what happens at the product end of life)

\*Taken as an average over all products sold in 2021 emissions are calculated from Normative Carbon Accounting Engine and include all available data. Where no such data exists, a calculated estimate has been substituted.

## MATERIALS OVERVIEW

### MFC RECYCLABLE CONTENT

The bioeconomy, a prominent resource-saving approach, states: It is better to use raw materials that regrow within a time frame of a generation than raw materials that take millions of years to regenerate.

Melamine Faced Chipboard used in the manufacture of office furniture at Hawk has been sourced from FSC® & PEFC certified suppliers. An assurance that the product that you are buying is from a sustainably managed forest.

The MFC boards that we source are made from approximately **88%** wood and paper with the exception of White, which is virgin wood and offset with the planting of trees by the supplier.

### STEEL RECYCLABLE CONTENT

The production of tube comes from purchases of raw material from steel mills, that employ two different production processes:

- BOF technology (steel from oxygen furnaces), with a scrap content of 15-25%
- EAF technology (steel from electric furnaces), with a scrap content of 80-90%

The type of supplied product shall be (unless different requirements are stated at the point of order) one of these two manufacturing processes, according to availability.

## CLEANING & CARE INSTRUCTIONS

### CLEANING & CARE INSTRUCTIONS

MFC is the most practical and low maintenance material for use in an office environment, offering the following benefits:

- Scratch resistant
- Resistant to household cleaning products and chemicals
- Resistant to cigarette burns
- Colour-fastness under artificial light
- Resistant to cracking
- Impact resistance
- Abrasion resistant
- Ease of maintenance
- Hygenic surface

### LIGHT SOILING

Clean with a paper towel, a soft clean cloth (dry/damp) or a sponge. If using a damp cloth, dry the surface with an absorbent paper towel or microfibre cloth.

### NORMAL SOILING / EXTENDED CONTACT

Clean with a paper towel, a soft clean cloth (dry/damp) or a sponge. If using a damp cloth, dry the surface with an absorbent paper towel or microfibre cloth. Clean with warm water, a clean rag or microfibre cloth, a soft sponge or soft brush. Use normal domestic cleaners or soaps that have no abrasive ingredients. Then wipe with fresh water, removing all traces of the cleaning agent, to prevent streaks forming. Dry the surface with a clean, absorbent cloth or paper towels.

The following cleaning agents should not be used under any circumstances:

- Scouring and abrasive agents (abrasive powders, scouring pads, steel wool)
- Polish, washing powder, furniture cleaner, bleach
- Detergents with strong acids and acidic salts
- Steam cleaning equipment

### METALWORK

Metalwork is polyester-resin powder-coated and resistant to minor scratching, chipping, abrasions, cracking and daily wear and tear and therefore only requires regular dusting and occasionally washing down with luke-warm soapy water if required. No strong detergents are required.
